Projects / Open-Source

AMMS 2.0 (Audit Management & Monitoring System 2.0)

Laravel, JavaScript, jQuery, MySQL

<https://amms.cag.org.bd/>

It is a government audit software and has more than 500+ users. Audit Directories use this system to carry out their work. A total of 15 types of users uses this system.

Challenging part was:

- Sending big data from one application to another application.
- Ignoring multiple API using at a time.
- Optimizing query to reduce time.
- Generating report faster.

CAG AMMS

Laravel, JavaScript, jQuery, MySQL

This system manages cost center data. Operates around 100000+ cost centers.

Key Responsibilities:

- Requirement analysis, planning, and task estimating.
- Participating in technical discussion meetings.
- Writing clean code and practicing best practices.
- Communicating with clients and providing the necessary support.

RPU AMMS

Laravel, JavaScript, jQuery, MySQL

17 Audit Directorate under all Ministries/Departments, Entities, Cost Centre's/Units of respond to objections and complete other activities.

Internal Audit (LGED)

Laravel, JavaScript, jQuery, MySQL

<https://webapp-lged.e-audit.xyz>

Performs audit activities of own organization. Uses Internal Audit Software to perform all activities.

Asset Management System

Laravel, Bootstrap, MySQL

It was my first project during internship. It was a basic project to store assets, manage stocks and tracking status of those assets.

Learnings:

- Basics of Laravel.
- The MVC pattern.
- Template Integration.
- Package Integration.
- Generating doc, pdf, excel.
